-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3748

Claim 6 is a method of using claim dependent on apparatus claims 1-5. This is improper and should be rejected under USC 112, 2nd paragraph and 35 UCS 101. Note MPEP 2173.05(q) "Use" Claims.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "especially" is vague and indefinite and should not be used in claim language.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by US 3516248 (McEwen).

McEwen discloses a Rankine cycle comprising heterocyclic aromatic compound.

Regarding claims 4, 6-8, note the compound pyridide in table I. Also, note the listing of fluid in columns 3-4 that meet the claimed limitations.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by US 4760705 (Yogev et al).

Art Unit: 3748

Yogev discloses a Rankine cycle comprising heterocyclic aromatic compound (note abstract).

Claims 1-3, 9, are rejected under 35 U.S.C. 102(b) as being anticipated by US 6918252 (Zimron et al).

Zimron et al discloses a Rankine cycle comprising heterocyclic aromatic compound.

Regarding claims 3, 9, note column 6, lines 58-67, and column 7, lines 1-17, the fluid can be mixed as claimed.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-8 are rejected under 35 U.S.C. § 103(a) as being unpatentable over U.S. 6918252 (Zimron et al) in view of U.S. 4342658 (Tincher et al). Zimron et al discloses all the claimed subject matter as set forth above in the rejection of claim 1, but does not disclose the specific fluid of claims 4-8. Tincher et al is relied upon to disclose it's well known to use 2-methyl pyridine and mixed with water (column 5, lines 55-68, and column 6, lines 1-31) for inhibiting corrosion. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to use the fluid of Tincher et al in Zimron et al for the purpose of inhibiting corrosion.
